# brother sewing machine manual vx 520

It is about 8 steps. Hope this helps. I just got a used PE150. The top thread keeps wrapping around the bobbin. It is not picking up the bobbin thread. Did you find a solution for your problem katfou First raise the presser foot then rethread the machine. Bottom looping is usually caused by a lack of top tension. There could also be a bur on the hook. You can find manuals online for a small price. At one time some sites had them for free, but I haven't been able to. Lower the pressor foot arm and it should snap right on. If not, press it up manually. If you don't have your manual, you can get it online at [www.brotherusa.com](http://www.brotherusa.com) Login to post I need to know how to thread it. If you refilled bobbin did the gear switch back completely or you have lost an o ring in bobbin rewind. After doing this you need to tighten it back up so you can sew again. This is where I am havin Link below is to videos on youtube regarding winding bobbins on brother sewing machines. If you don't find an answer there please re submit your problem. Brothers Sewing machine wind bobbin YouTube I want to know how to thread and use it. If none of this works then it may need to go to the shop. Best of luck and happy sewing! For embroidery, and zigzag, and because the needle makes side movements, it needs more needle thread. So try to keep you needle thread not very tight, and tight up your bobbin case tension more, so that the two threads meet under the material. I need to know how to thread it.
